## Speaking Topics

### THE WISDOM OF TREES FOR CHALLENGING TIMES

In this profound talk, Beth shares how the wisdom that trees have acquired as they have overcome disease, infestation, weather events, and other disruptions in their 370-million-year history, provides comfort, guidance, and hope for us in uncertain times.

### SEEKING THE SACRED: FROM YOSEMITE TO YOUR OWN BACKYARD

In this provocative keynote, Beth offers several practices to enrich and deepen our experiences of the sacred in National Parks and other designated natural areas. She then invites us to employ the same curiosity and wonder we bring when exploring these special places to find the sacred in our own backyards.

### DO WE REALLY LOVE NATURE—OR ARE WE NATURE NARCISSISTS?

In this impactful talk, Beth explores whether the love we say we have for nature is reflected in our day-to-day lives. She offers specific suggestions on how we nature lovers might regularly consider the needs of the natural world and, in so doing, discover a rich and deep connection with the living world.
